

HCLSoftware

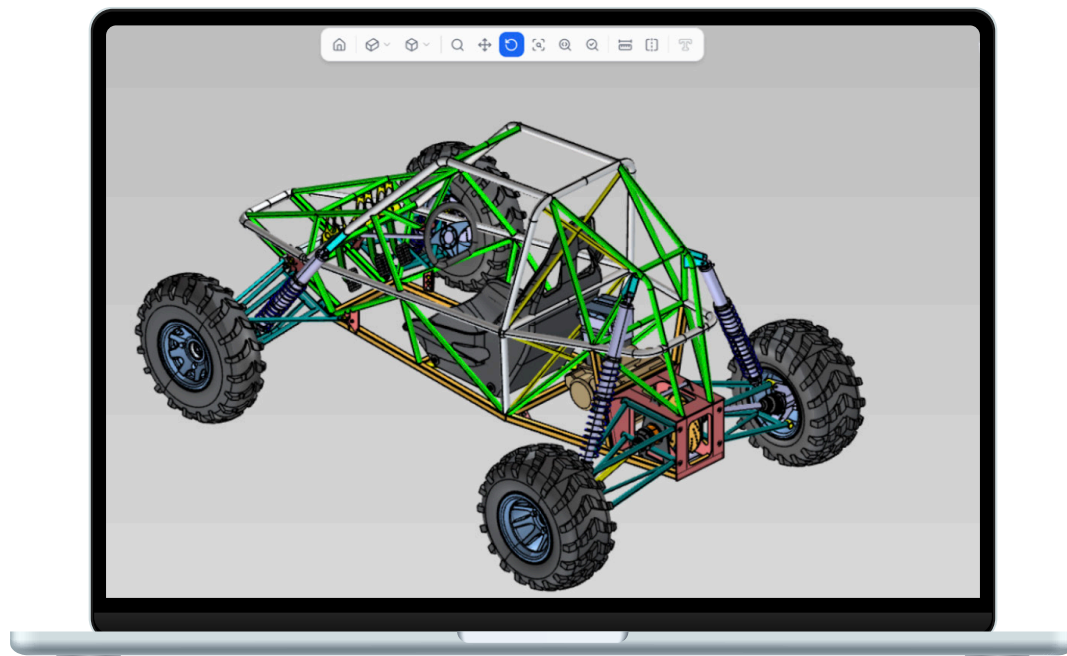

Glovius Sync: Accelerate Engineering Collaboration

Virtual design reviews that reduce IT overheads and streamline contextual feedback in a central, secure environment.

Glovius Sync is a browser-based, purpose-built virtual design review platform that brings your entire team together—no CAD software, PLM access, or heavy viewers required.

Stop letting legacy software slow down your product launches.

Zero Installation

Open, view, and mark up models directly in your browser.

100% Inclusive

Give sales, product, and suppliers an easy seat at the table.

Secure & Affordable

Modern collaboration without the enterprise price tag or security headaches.

Core Features

Virtual Design Reviews

Conduct virtual design reviews in three simple steps. Upload your designs, invite participants, and start your design review.

AI DFM Review

DFM Review, powered by Gemini, runs a first pass check trained on design standards and industry best practices.

Secure Data Sharing

Give teammates and suppliers controlled, browser-based access to review design versions without sharing raw files or setting up FTP servers.

CAD in the Browser

View CAD designs in the browser, without the need for licenses or software installation.

Markup Tools

Add Pins, Capture View States, Redline, and add Text comments and markups.

Review Tracking & Documentation

Request feedback, generate Design Review Reports, and convert feedback into actionable TODO items.
